This logbook is a record-keeping tool. It does not provide beekeeping instructions, veterinary advice, or professional recommendations. Consult local mentors and licensed experts for guidance.

This Logbook Belongs To

Name: _____

Apiary Name: _____

Address: _____

Phone: _____

Email: _____

How to Use This Logbook

Inspect on a consistent cadence. Weekly during active season gives you enough resolution to catch problems early without over-handling the colony. Record every inspection, even a quick one -- a blank week is itself useful information later.

Record what you observe, not what you assume. Write down queen sightings, egg patterns, and brood coverage exactly as seen. Interpretation is easier in hindsight than a missing data point.

Cross-reference the Pests & Disease Log with your weekly pages. If you note a pest or disease sign during a weekly inspection, log the full incident on the dedicated pages so treatment and follow-up dates stay in one place.

How to Use This Logbook

Use the abbreviation legend on the next page consistently. Shorthand only works if it means the same thing every time you write it.

Keep the Year-at-a-Glance pages updated after each inspection round. They are your fast reference when planning the next visit across every hive in the yard.

At season's end, complete the Annual Summary while the details are still fresh. Next year's plan is only as good as this year's honest record.

Legend & Abbreviations

Q+ Queen sighted

E Eggs present

CB Capped brood

SHB Small hive beetle

EFB European Foulbrood

Q- Queen not sighted

L Larvae present

V Varroa count

AFB American Foulbrood
