ESSENTIAL COOKING TIPS & TECHNIQUES

■ Knife Skills

Keep your knives sharp — a sharp knife is safer and more precise than a dull one. Use a honing steel before each use.

■ Seasoning

Season in layers throughout cooking, not just at the end. Taste as you go. Salt enhances flavor — use it generously.

■ High Heat Searing

Pat meat completely dry before searing. Moisture is the enemy of a golden crust. Hot pan + dry surface = perfect sear.

■ Fat = Flavor

Don't fear fat. Butter, olive oil, and rendered fats carry flavor compounds that make food taste richer and more complex.

■ ■ Temperature Control

Invest in a meat thermometer. Chicken: 165°F, Beef medium: 145°F, Pork: 145°F. Never guess doneness.

■ Mise en Place

Prepare and measure all ingredients before you start cooking. This French technique prevents mistakes and reduces stress.

■ Acid Balance

A squeeze of lemon or splash of vinegar brightens any dish. When something tastes flat, acid is often the answer.

■ Resting Meat

Always rest cooked meat 5-10 minutes before cutting. This allows juices to redistribute for a juicier result.
